

# Mammal Recording

## How Citizen Science is Informing Conservation

Thursday 22 February 2018      7.30pm - 10pm  
**MAIDENHEAD**

Dave Wembridge from PTES (People's Trust for Endangered Species) will talk about two Citizen Science projects, which have been running since 2001 and 2003, and how the survey results over the years are informing conservation.

The two PTES surveys – Living with Mammals and Mammals on Roads - aim to show how our wildlife populations are changing, both in our rural areas and in our towns and cities.

Dave will talk about the PTES surveys, what the results can tell us - from the miles of surveyed roads and monitored urban areas - about trends in our mammal populations and how that citizen-recorded data is being utilised.

**Location :** Wildlife Trust (BBOWT) Education Centre, Woolley Firs, Cherry Garden Lane, Maidenhead SL6 3LJ

**Price :** Suggested donation £3 per person

**Suitable :** For all ages.
